

Evolve and MediViewer	
<p>MediViewer is now the eDMS (Electronic Document Management System) for the whole of UHSx. The only purpose of using Evolve now is to complete e-forms - this will stay in Evolve until EPR e-noting is fully in place.</p>	
 Evolve 	Select Evolve if you want to complete an e-form.
	Evolve will open in a separate tab. To return to Affinity Portal, close the tab by clicking on the X when you have finished completing e-forms.
 MediViewer Documents	Select MediViewer Documents and this will open the patient's MediViewer documents within the Affinity window (iFrame).
 MediViewer 	Select MediViewer if you want to open the system in a new tab.
	To return to Affinity Portal, close the tab by clicking on the X when you have finished with MediViewer.
Please search MV on IRIS to view the MediViewer Guides & e-Learning.
