

Searching Patient Casenotes	
<p>There are various ways in which you are able to search within a patient's case note. Please follow the steps below to search the entire case note including historical notes</p>	
<p>Search for the required patient. Select the  icon located on the tab banner on the left hand side of the screen</p>	
<p>A search page will open. Click into the search bar on the top of the page to enter your required search criteria</p>	
	
<p>If you know the exact name(s) of the document then type this into the search bar. To start the search click the magnify glass within the box The search may return words that are similar to those that you have entered, to ensure it only returns the exact wording enter the words or phrases into quote marks "", this will only return occurrences of the chosen word(s) e.g. "major heart attack"</p>	
	
<p>The results will then appear as a list of document summaries in the right hand panel of the screen. Select  at the end of the result or click on the title of the document to open</p>	

Searching Patient Casenotes

If the document has been filed within a specific category you are able to filter the search results. Click on the category so it becomes highlighted, the search results will then appear refreshed in the right hand panel. To return to the general filter unselect the category
