

InTouch Flow Manager – Marking a Patient as Seen Clinician

When the patient has been seen by the clinician, the patient’s appointment must be marked as “Seen Clinician”.

Step 1.

Find the patient’s row and tick the “**Seen Clinician**” tick box

Once ticked, a time stamp will appear showing the time from when the patient was marked as seen by the clinician.

Note: If a patient was marked as Seen Clinician in error, UNTICK the Seen Clinician box.
