

Clinical Worklist Setup

In the Clinical Worklist you can bring up a patient list by setting filter criteria in the top left

Criteria	Meaning/Use
Clinician	Do not use this – This is just a list of all Clinicians within G2 SpeechReport
Lead Clinician	This is the lead clinician for a clinic pulled through from CareFlow – Always use this to start
Clinic Date	Used for finding patients from the desired clinic on a specific date
Treatment	This is the Specialty that a patient is under – only use this if you’re sure that the desired clinic will show, otherwise leave blank
Location	This is the hospital site – best to leave blank in case a clinic from CareFlow has a default location that is different to that of the clinic site
