

Adding NEWS2	
The Vital Signs section of the Obs flowsheet does not include 'NEWS2 (Calc)' or other non-critical care observations by default and these need to be manually added	
The Add/Remove rows guide shows adding individual rows and generically shows adding row families if needed. This guide is only for adding NEWS2	
Click the Add/Remove Rows button in the banner	
Select Row Families	
Select 1: Ward Level Observations	
Click Add > or double click the row family	
Note - you can right-click the row family to see which rows this will add	
If you need to be able to chart these fields retrospectively, click Change Time and backdate the start as needed	

Adding NEWS2																																																	
Click OK																																																	
Rows that have been added will also show in pink text (validated data)																																																	
All NEWS2 rows appear in the Vital Signs chart																																																	
Click Save Chart to save additions																																																	
If observations are auto-charted from a patient monitor then the value boxes will show a small diagonal line	<table><thead><tr><th>Observations</th><th>15/07/2026 08:00</th><th>09:00</th><th>10:00</th></tr></thead><tbody><tr><td>Bedside Nurse</td><td></td><td></td><td></td></tr><tr><td>Nursing Event</td><td></td><td></td><td></td></tr><tr><td>NEWS 2 (calc)</td><td></td><td></td><td></td></tr><tr><td>HR</td><td></td><td></td><td></td></tr><tr><td>Cardiac Rhythm</td><td></td><td></td><td></td></tr><tr><td>Art BP</td><td></td><td></td><td></td></tr><tr><td>NBP</td><td></td><td>125/75</td><td></td></tr><tr><td>Temp</td><td></td><td></td><td></td></tr><tr><td>Temp</td><td></td><td></td><td></td></tr><tr><td>Site</td><td></td><td></td><td></td></tr><tr><td>Airway</td><td></td><td></td><td></td></tr></tbody></table> NBP 08:18: 125 / 75 Site:	Observations	15/07/2026 08:00	09:00	10:00	Bedside Nurse				Nursing Event				NEWS 2 (calc)				HR				Cardiac Rhythm				Art BP				NBP		125/75		Temp				Temp				Site				Airway

NBP		125/75																																															
Temp																																																	
Temp																																																	
Site																																																	
Airway																																																	

Adding NEWS2	
Note – NEWS2 will only calculate if Obs are charted at the same time	
To retrospectively match up obs for the NEWS2 calculation: Right-click the charting button and choose Exact or click Change Scale in the banner and choose Exact	 OR 
The NEWS2 calc will auto-populate into some other flowsheets and if documents are added after a NEWS2 calc then you can use the Load Defaults button to bring this data across
