

Discarding changes to a chart	
If you have made a change to an individual cell/field in the observations chart, right-click the cell	
Select Discard	
If you have made lots of changes or edited a few details on a form incorrectly, use the Discard select in the chart tab	
Selection – Only discards the current cell/field on a form/chart	
Document will discard all pink (validated) data on the current document	If this was a newly added document, clicking this option before saving will also remove this document from the patient record
All – Discards all changes and additions since your last save across any documents, charts and forms
