

MEDVIEWER – ADD / REMOVE THE FAVOURITE INDICATOR

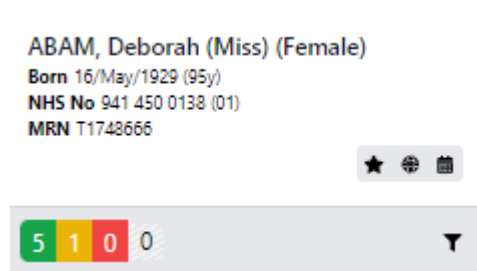

The Favourite indicator   can be toggled on and off in several different areas:

- The Patient Block above the Episodes View, within the patient’s Health Record
- The Clinical Activity screens
- The Favourite screens
- The Recent screens

It is recommended to make good use of this feature to work more efficiently.

On first entering the patient’s Health Record...

The Favourite indicator is in the Patient Block, top-left:

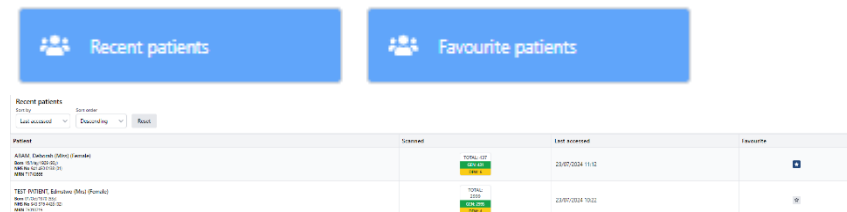

Click on the indicator to change its current setting.

- Clinical Activity buttons
- Recent buttons
- Favourite buttons

Click on the relevant **button** above

The relevant screen displays:

Once you have filtered and sorted the screen as you require, click on the indicator to change its current setting.

Note: When toggling the indicator off in the Favourite screens, that item will still display until such a time as the screen is refreshed e.g. if you exit and return to that same screen.
