## MEDIVIEWER – CONTEXTUAL LINKS TO OTHER SYSTEMS

From within the Patient Block, within the patient's Health Record, it is possible to access that patient's record held in iGrow.

iGrow is the system that stores the growth charts of paediatric patients.

|	
Whilst in the patient's Health Record, click the **Globe** icon in the Patient Block, top-left	The **Outbound Integrations** menu displays: ABAM, Deborah (Miss) (Female) **Born** 16/May/1929 (95y) **NHS No** 941 450 0138 (01) **MRN** T1748666 Saved Filters Outpatient General surgery 8 1 0 0 Outbound integrations iGrow Click on iGrow to enter that patient's record in that system. Navigate the patient's record in the relevant system as you normally would.

Note: It is also possible to enter MediViewer through other Trust systems. A contextual link is available from the patient's page in Affinity and Panda.

⚠ MediViewer ⬀

When using this feature from these clinical portals, the MediViewer window is not navigable to other patients.

Reminders and Collections are not available via this viewing method.

Close the patient's window then use the contextual link after finding the next patient.
