MEDIVIEWER – SAVE AND VIEW A SAVED COLLECTION Saving Collections ensures you can return to them at a later date. Saved Collections cannot be shared with other users individually, but a Collection can be made Public, so ALL users can see the Collection. However, Collections are meant to be used for a temporary period and not to stay permanently in the system. See the preceding **Create a Collection** guide, if necessary. SAVE A COLLECTION Once you have finalised The Collection Menu displays: your Collection, click the 2 0 Ribbon in the Collections × View (not the Pages View) Investigations ... $\sim -$ Rev: 1.0 04/06/2024 1 of 1 Correspondence 🔼 🗕 Rev: 1.0 Trauma & Orthopaedics 21/05/2024 1 of 2 Click on the Save option The **New Collection** pop-up window displays: ९ 🕇 🔳 👌 🚺 २ 🚺 Export Remove all pages Save

	New collection X			
	New collection Collection name New Collection Description Expires on DD / MM / YYYY Tomorrow 2 days 7 days 14 days			
	Cancel Save			
Type in an appropriate name for the selection of Pages and Bundles you have made	If you are going to make this Collection public, it is even more important to give it a suitable name. You can type in a Description to add more context about the contents of the Collection.			
Ensure you create a Expiry Date by either typing one in, using the Calendar or the quick date buttons	If you are going to make this Collection public, it is even more important to set an Expiry Date otherwise Health Records get over- populated with old, redundant collections.			
If this Collections needs to be accessible to all, click the Public tickbox to add a tick	Consider the impact of this Collection being seen by all users before proceeding to save it.			
Click the Save button	The Collection is Saved automatically. Click the X to exit the Collections screen.
